MUNICIPAL HISTORY-Several columns of our space this week is given o a detailed history of city affairs durng the past year, which will doubtless prove of much interest to all concerned -the taxpayers of Ypsilanti. In connection with this history will be found Mayor Cornwell's inaugural address to the new Council, the new committees, and the list of city officers elected by the Council for the present year.

DeBever, of St. John's Catholic church, awoke about five o'clock, last Sunday red and other Pomona business transmorning suffering severely from a dis-acted. tressing headache and sickness at his stomach. He left his room and went out into the yard, which to his dazed and disturbed senses seemed to be "standing on end" and whirling around at a high rate of speed. It was afterwards ascertained that his suffering was caused by coal gas poisoning, the stove in his sleeping room having permitted gas to escape during the night.

The cost of such an effort, we are certain, would be provided for by a general subscription from business men and property holders, as has been done elsewhere, and there are many reasons for believing that such an outlay would be money wisely ex-

POSTPONED AGAIN.-James Bentley, the defendant in the school-room assault case, the particulars of which were given last week, was brought here from Ann Arbor last Monday morning for trial, but on motion of Mr. Knowlton, of Ann Arbor, Bentley's attorney, the case was posponed until next Monday, May 9. Bentley asserts that his purpose in visiting Mrs. Lockwood at the school was to persuade her to grant him further time on the mortgage; that he did not ask to have it relinquished, and that the struggle between Mrs. L and himself was caused by her attempt | make an extended visit with her parto recover some letters he had taken ents and friends. FAIR WARNING-In his inaugural Cornwell called attention to the position of a majority of the voters of Ypsilanti on the question of prohibiting the saloon, as shown by the vote followed his reference to that vote by advising the Council and other city officers to assist in rigidly enforcing the jured. present laws. A GRANGE REUNION.—In response to printed invitations sent out during the past week, a reunion of about one hundred present and former members of the Ypsilanti Grange was held at their hall yesterday afternoon. To have a general good time, socially, was the principal purpose of the reunion and that purpose was fully carried out. The principal feature of the exercises was an address by Andrew Campbell, in which the purpose and necessity of organization was presented in an interesting and convincing manner. The Ypsilanti Grange was organized in 1873, with twenty charter members, four of whom, Edward King, J. Evarts Smith and Mr. and Mrs. Andrew Campbell, are still active members. Its entire membership during the fourteen years of existence numbers 193, seventeen of whom have died. The present membership of the Grange is fifty-seven. servant girl of Atwood, Rawlins county, lived in an interior Ohio town. Her father, a wealthy German, had incurred the enmity of some countrymen, and in order to revenge themselves they kidnaped her and took her to Germany. Here she was recovered by friends of her father and placed in the hands of a tutor, who soon became devoted to her. Another man also conceived a liking for her and attempted to keep company with her. This aroused the anger of the tutor, and he swore vengeance. One day while the tutor and Mary were walking out on a country road they met the other suitor and the tutor drew a revolver and fired point blank at his rival. Mary seized the smoking weapon, and when several people came up still held the revolver under the suspicious circumstances. She was charged with having shot one of her suitors. The cowardly teacher also accused her of the crime. She was arrested and by some means managel to escape, and, in company with her uncle, fled to America. couple traveled as father and daughter, and, coming West, settled at Atwood, Kas., and she went to work as a servant. The real murderer died in Germany during the month of February. Prior to his death he made a confession by which Mary was entirely cleared of any charge of murder. The time had come in my boyhood emanated from the big safe. which demanded of me a capacity to smoke. The old people of the household could abide neither the sight nor the smell of the Virginia weed. When ministers came there, not by positive injunction but by a sort of an instinct as to what would be safest, they whiffed their pipe on the back steps. If the house could not stand sanctified smoke. It may be imagined how little chance there was for adolescent cigar-puffing.

By some rare good fortune which put in my hands 3 cents, I found access to a tobacco store. As the lid of the long, narrow, fragrant box opened, and for the first time I owned a cigar, my feelings of elation, manliness, superiority, and anticipation can scarcely be imagined, save by those who have had the same sensation.

When I put the cigar to my lips and stuck the lucifer-match to the end of he weed and commenced to pull with an energy that brought every facial muscle to its utmost tension, my satisfaction with this world was so great, my temptation was never to want to leave it.

The cigar did not burn well. It required an amount of suction that tasked my determination to the utmost. You see that my wordly means had limited me to a quality that cost only draft. The man opened the package three cents. But I had been taught and gave him the identical \$25,000 in that nothing great was accomplished without effort, and so I pulled away. With these sentiments. I passed down the village street, and out toward my country home. My head did not feel exactly right, and the street began to rock from side to side, so that it became rather uncertain to me which side of the street I was on. So I crossed over, but found myself on the same side that I was on before I crossd over. Indeed, I imagined that I was on both sides at the same time, and several fast teams were driving between. met another boy, who asked me why looked so pale, and I told him that I did not look pale, but that he was pale himself. After some further walking, I sat down under the bridge near my house and began to reflect on the prospect of early decease, and on the uncertainty of all early expectations. I had determined to smoke the cigar all up, and thus get the full worth of my money, but was finally obliged to throw three-fourths of it away. I knew, howevey, exactly where I threw it, in case

I should feel better the next day. Getting home the old people were frightened and demanded of me an explanation as to my absence and the rather whitish color of my complexion. Not feeling that I was called to go into particulars, and not wishing to increase my parent's apprehension that I was going to turn out badly. I summed up the case with the statement that I felt miserable at the pit of the stomach. Mustard plasters were immediately administered, and I received careful watching for some hours. Finally I fell asleep and forgot my disappointment and humiliation in being obliged to throw away three-fourths of my first eigar. - T. De Witt Talmage in Brooklyn Magazine.

The Mouvement Geographique contains a report by Dr. Junker on the district of the Inelle. The Inelle is a tributary of the Congo, and rises in the mountains near the Albert lake. Dr. Junker has explored a great portion of its course, hitherto unknown. The Inelle is navigable for some distance, and therefore affords a new waterway toward the district of the Upper Nile. The country through which it flows is very fertile. The ra-vines and valleys are filled with splendid bananas and oil palms. The whole district gives the impression of an earthly paradise. The population is very thick. Village after village, or rather groups of houses, surrounded with plantations, form a chain along the course of the river. Some parts are so populous that 250 inhabitants may be reckoned to the square mile. The principal tribes in the basin of

the Upper Inelle are the Niam-Niams and the Mombouttons. They are cannibals, and in figure, color, and customs differ little from the people of the Upper Congo. The Niam-Niams are fond of wearing chains made of the teeth of their victims, and the skulls of those whom they have eaten belong to their trophies. In war time they eat those they have killed. Any individual, solitary and without relations, who dies is eaten where he dies. Cannibalism is most prevalent among the tribes that live nearest the Congo. The people go almost naked. The women wear merely an apron of leather or banana leaves, They all paint their bodies with black designs and carefully dress their hair. The women take charge of the household, cultivating the ground, gathering in the harvest, drying the grain and manufacturing the utensils and basketwork. The men, unless hunting or fighting, lie idly stretched on benches under the palm trees, smoking in the

At midday they go into the great halls, where they keep up a lively conversation. Polygamy is the fashion. and the marriage tie is little regarded. The chiefs have one hundred wives. As everywhere in places on the tributaries of the Upper Congo little visited by Europeans, ivory is surprisingly abundant. On the shores and large inhabited islands of the Inelle there are immense stores of ivory. Emin Bey had collected at Wadelai stores of ivory from all the provinces, the value of which will more than cover the expense of the expeditions sent out to his rescue. Dr. Junker's explorations are of great value to science.

Now that it is known that the great river Inelle is connected with the Congo by the Obanji a long and splendid waterway is opened up between Leopeldville, on the Stanley pool, and a point very near the Nile. A railway only 280 kilometers long by the side of the falls of the Lower Congo would unite the west coast and the central districts of Africa, and goods from Banana and Boma could be carried to the Upper Inelle in the course of five or six weeks, while steamers laden with ivory, gums, palm oil, etc., could be returned.

Another use for pine needles besides that of spreading an aromatic odor through the fancy covering of a pine pillow has been developed by a new Southern industry. One product of the pine needles is a remarkably strong oil that possesses many medicinal virtues. Another is pine wool, which is bleached, dyed, and woven. The wool is a fleecy brown mass, possessing a pleasant odor, which gives it value as a moth destroyer when used as a carpet lining. A strong, cheap matting is made from the wool, useful for halls, stairways, and offices.

### THE BASILISK.

A STORY OF TO-DAY.

CHAPTER XXVII.—CONTINUED.

I took the hint, and after Shaw and I had wished the worthy official good-night. we strolled up Whitehall, my head burstconflicting ideas, my heart full of anxiety as to the fate of her who was my only thought in this weary conflict of crime. Shaw was careful not to interrupt the silence, which he evidently knew I was incapable of breaking. We had passed the Grand Hotel, and were approaching Charing Cross railway-station. when a hansom blocked our progress as we attempted to cross the street. The light of a gas-lamp fell right across the of the cab-a female thickly veiled. Yet as my eyes fell upon her, as the hansom went swiftly on its way, I clutched Shaw by the arm, and almost fell upon the pavement. I had recognized her. It was the Basilisk. Few could have known Miss Beaufoy-I should not myself, but that she recognized me. It was the quick flash of her magnificent eyes through the meshes of the veil, which revealed to me that this woman in black was none other than the imperious mistress of Hanover Lodge. The attraction may have been magnetic, it was certainly effective. I had time to notice a black bag with a white band on the roof of the cab before

it was whirled away eastward.

I could only gasp, "She—the Basilisk!" as I pointed after the fleeting hansom. 'My dear fellow," replied the Docto. "you are letting your fancies run away with you. At the present moment both the amiable lady (whom you call the Basilisk) and her excellent father (our patron) You have no more seen Miss Beaufoy than

"The way is Harritch!" I repeated.

"What can that mean?"
"It means," said Shaw, "that we are on the track; it means that you have a friend in court; it means that Plowitz has attempted to carry Mary to Belgium by way of the Great Eastern Railway.

"How do you know that?" I asked. "There is a line of steamers from Harwich to Antwerp," he replied. "Who is

"You can trust her?" "I think so. I must start at once." "No," said Shaw, "wait. In the first-

"You see," said Shaw, "according to your idea, there is every reason to trust Mrs. Hardy's information. If it be accurate, Plowitz cannot cross to Antwerp till tomorrow, or rather, as it is now past three, this evening. "So may the other," I answered; "much more probably. Once before they pretended that she had gone, and kept her a prisoner. This is only a variation of the old trick. The note about the Harwich route is a clumsy forgery. It would have sent us off on a wild-goose chase, and meanwhile Plowitz could carry her off some other way without fear of interruption."

Shaw seemed impressed. "You know them better than I do."

"Yes; I will go at once."

BOB INGERSOLL'S REGIMENT.

The following in reference to Col. Robert G. Ingersoll's Regiment in the war for the Union will be found interesting: The Eleventh Illinois Cavalry was mustered in at Camp Lyon, Peoria, Ill., Dec. 20, 1861, Colonel R. G. Ingersoll commanding. It remained in camp until Feb. 22, 1862, when it was sent to Benton Barracks, and then went to Crump's Landing, Tenn., to oin the brigade of General Lew Wallace. The regiment was under fire for a time at Shiloh, and lost heavily in killed and wounded. It was subsequently in the fights at Bolivar, Tenn., Corinth and Iuka, Miss., and during the winter following was stationed at Jackson, Tenn. In a fight with Forrest's raiders in December, seven officers, including Colonel Ingersoll, and but were paroled on the following day. THE ENCAMPMENT IN ST. LOUIS. The preliminary arrangements for the National encampment of the Grand Army of the Republic, which is to be held in St. Louis next September, are being vigorously pushed. Information so far received from posts in all parts of the country indicate that fully 100,-000 members of the Grand Army will be there, and provision is being made for that number and as many more as may come. The Finance Committee have commenced active work, and there is every indication that \$100,000 will be raised for entertainment purposes and general expenses. The Secretary of War will be asked to furnish tents for use during the encampment and the Inter-State Commissioners have been requested to take prompt "Now then; where is the cab?" Rev. F. Asbury Howell, Pastor of the M. E. Claurch, of Silverton, N. J., says: "I was afficted with catarrh and indigestion. Bolls and blotches began to arise on the surface of the skin, and I experienced a tired feeling and dullness. I began the use of Dr. Pierce's Golden Mcdical Discovery as directed by him for such complaints, and in one week's time I began to feel like a new man, and am now sound and well. Skin Disease.—The "Democrat and News," of Cambridge, Maryland, says: "Mrs. Eliza Ann Poole, wife of Leonard Poole, of Williamsburg, Dorchester Co., Md., has been cured of a bad case of Eczema by using Dr. Pierce's Golden Medical Discovery. The disease appeared first in her feet, extended to the knees, then attacked the elbows and became so severe as to prostrate her. After being treated by several physicians for a year or two she commenced the use of the medicine named above. She soon began to mend and is now well and hearty. Mrs. Poole thinks the medicine has saved her life and prolonged her days."

Mr. T. A. Athes, of East New Market, Dorchester County, Md., youches for the above facts.

THURSDAY, MAY 5, 1887. LOCAL option arouses the fierce opposition of the Free Press. High taxation equally arouses the opposition of the Free Press. So does prohibition. The Free Press wants the business left alone. It makes a show, indeed, of consenting to an increase of tax, but finds fatal objection in the details of any plan proposed, and will undoubtedly continue to find such objection. The Free Press discounts the vote cast for the amendment by assuming that many voted for it for reasons other than approval of its principle—as dissatisfaction with the disposition of the tax, etc.; but it ignores the equally plausible assumption that many voted against it for reasons other than disapproval of JOHN B. VAN FOSSEN, D. D. S. its principle—as doubt of its efficacy, etc. So, it may be fairly assumed that the vote correctly represents the present disposition of the people of the state upon the proposition to prohibit. That vote shows the significant fact that the subject was more interesting and important in the minds of the people than the choice of any officers or the success of any party. There were cast upon it, for and against, 737 more votes in the state than were cast for and against any candidate or any party; and that vote was divided, 50.8185 per cent. against, and 49.1815 per cent. for -a majority of a little over one half of one per cent., or exactly 636 votes in 100,000—which is a very slight preponderance. The Free Press, however, is quite gleeful over even that preponderance, and assumes it to be a declaration of approval of the existing policy. Even if it were so, it would be an approval so lame and impotent as to be a practical disapproval. A policy that had only been able after thorough trial to satisfy a majority of six hundred and voters—that is condemned by more than 49.181 of every device. than 49,181 of every 100,000 voters in the state-can not claim to be a satisfactory policy, and would best be aban-But the vote has not even that poor significance in that behalf. It can not at all be taken as an expression upon changing the present policy, but only upon changing from this to that. That so many were in favor of changing from this to that shows that certainly so many were in favor of changing; but it does not in the least show that no more were in favor of changing from this to something that should be better than this; and to every thoughtful and unprejudiced mind that vote must be regarded as an overwhelming condemnation of the present policy. If the suggestion of this paper, made several months ago, to submit alternative propositions, for and against prohibition, for and against local option, and for and against high license, had been adopted, the popular preference might have been more certainly known but the popular disapprobation of the present policy could scarcely have been more emphatically shown. It is the business of the Legislature to provide what in its judgment will best satisfy the popular preference, and the correctness of that judgment will not long remain in doubt. If the democratic legislators follow the line indicated by the and no discount, go to Free Press, they may, indeed, satisfy some of their immediate constituencies, but the number of those constituencies will be lessened; and if republican legislators fail to give the state something more satisfactory than the present policy, the number of republican constituencies will be lessened. In our opinion, the most satisfactory policy at the present time would be combined town and county option, with higher tax or license where that method shall prevail. and more effective provisions for enforcement, and with provision that the option policy cannot be resubmitted under two years. Individually, we question the value of high license as a

AT last, we have the official vote of the state at the late election, except as to Isle Royale county, from which nobody expects or cares to hear. The return of Manitou was only secured by despatching a special messenger from Lansing, who had to charter a steamer to reach the island community, and was rewarded by finding 3 republican and 104 democratic votes, and 18 prohibition and 124 anti-prohibition votesby which it appears that the industry of Whisky Island was the chief subject of interest there. DAKIN has been expelled by the unanimous vote of the House, and that body feels that it has purged itself of the disgrace, but it hasn't. Dakin was expelled on his own admissions that he tried to extort money from lobbyists for treating and feasting to promote the passage of their bill, with the wellgrounded suspicion that he intended to put the money in his own pocket. But the members of the committee who have been doing about the same thing all through the session remain, unrebuked by the House. To be sure, they have thought it prudent to remove from | commission and give permanent employ the Committee room the placard that ment. We have many new and choice specdisplayed the significant suggestion-'We smoke; if you don't, up goes your bill"-and so much has been gained in the direction of propriety and dignity,

in a queer hole. The appropriation for printing is exhausted. The criminal code forbids any officer of the state to contract any indebtedness of the state without an available appropriation, upon pain of fine and imprisonment. No bill can become a law until it has been printed; and the Legislature is therefore powerless to make an appropriation to meet the emergency, or to amend the law allowing a debt for printing to be contracted. Thus the machinery of the state is effectually relieve it from the embarrassment and print a bill, and that would not be official and possibly not legal.

Ayer's Hair Vigor keeps the hair soft and pliant, imparts to it the lustre and freshness of youth, causes it to grow luxuriantly, eradicates Dandruff, cures all scalp diseases, and is the most cleanly of all hair preparations.

AYER'S Hair Vigor has given me perfect satisfaction. I was nearly bald for six years, during which time I used many hair preparations, but without success. Indeed, what little hair I had, was growing thinner, until I tried Ayer's Hair Vigor. I used two bottles of the Vigor, and my head is now well covered with a new growth of hair.

HAIR that has become weak, gray, and faded, may have new life and color restored to it by the use of Ayer's Hair Vigor. \*\*My hair was thin, faded, and dry, and fell out in large quantities. Ayer's Hair Vigor stopped the falling, and restored my hair to its original color. As a dressing for the hair, this preparation has no equal.—Mary N. Hammond, Stillwater, Minn.

VIGOR, youth, and beauty, in the appearance of the hair, may be preserved for an indefinite period by the use of Ayer's Hair Vigor. \*\*A disease of the scalp caused my hair to become harsh and dry, and to fall out freely. Nothing I tried seemed to do any good until I commenced using Ayer's Hair Vigor. Three bottles of this preparation restored my hair to a healthy condition, and it is now soft and pliant. My scalp is cured, and it is also free from dandruff.—Mrs. E. R. Foss, Milwaukee, Wis.

### CHICAGO, ROCK ISLAND & PACIFIC R'Y

By reason of its central position, close relation to principal lines East of Chicago and continuous lines at terminal points West, Northwest and Southwest—is the only true middle-link in that transcontinental system which invites and facilitates travol and traffic in either direction between the Atlantic and Pacific.

The Rock Island main line and branches include Chicago, Joliet, Ottawa, La Salle, Peoria, Geneseo, Moline and Rock Island, in Illinois; Davenport, Muscatine, Wazhington, Fairfield, Ottumwa, Oskaloosa, West Liberty, Icva City, Des Moines, Indianola, Winterset. Atlantic, Knoxville, Audubon, Harlan, Guthrie Centre and Council Bluffs, in Iowa; Gallatin, Trenton, St. Joseph, Carneron and Kansas City, in Missouri; Leavenworth and Atchison, in Kansas; Albert Lea, Minneapolis and St. Paul, in Minnesota; Watertown in Dakota, and hundreds of intermediate cities, towns and villages.

THE CREAT ROCK ISLAND ROUTE

Guarantees Speed, Comfort and Safety to those who travel over it. Its roadbed is thoroughly ballasted. Its track is of heavy steel. Its bridges are solid structures of stone and iron. Its rolling stock is perfect as human skill can make it. It has all the safety appliances that mechanical genius has invented and experience proved valuable. Its practical operation is conservative and racthodical—its discipline strict and exacting. The luxury of its passenger accommodations is unequaled in the West—unsurpassed in the world.

ALL EXPRESS TRAINS between Chicago and the Missouri River consist of comfortable DAY COACHES, magnificent PULLMAN PALACE PARLOR and SLEEPING CARS, elegant DINING CARS providing excellent meals, and—between Chicago, St. Joseph, Atchison and Kansas City—restful RECLINING CHAIR CARS.

THE FAMOUS ALBERT LEA ROUTE

Is the direct, favorite line between Chicago and Minneapolis and St. Paul. Over this route solid Fast Express Trains run daily to the summer resorts, picturesque localities and hunting and fishing grounds of Iowa and Minnesota. The rich wheat fields and grazing lands of interior Dakota are reached via Watertown. A short desirable route, via Seneca and Kankakee, offers superior inducements to travelers between Cincinnati, Indianapolis, Lafayette and Council Bluffs, St. Joseph, Atchison, Leavenworth, Kansas City, Minneapolis, St. Paul and intermediate points.

All classes of patrons, especially families, ladies and children, receive from officials and employes of Rock Island trains protection, respectful courtesy and kindly attention.

### How's Your Liver?

Is the Oriental salutation. knowing that good health cannot exist without a healthy Liver. When the Liver is torpid the Bowels are sluggish and constipated, the food lies in the stomach undigested, poisoning the blood; frequent headache ensues; a feeling of lassitude, despondency and nervousness indicate how the whole system is deranged. Simmons Liver Regulator has been the means of restoring more people to health and happiness by giving them a healthy Liver than any agency known on earth. It acts with extraordinary power and efficacy.

NEVER BEEN DISAPPOINTED. As a general family remedy for Dyspepsia,
Torpid Liver, Constipation, etc., I hardly
ever use anything else, and have never
been disappointed in the effect produced;
it seems to be almost a perfect cure for all
diseases of the Stomach and Bowels.

Ba and by the preparations which are being made on all sides for the celebration of the jubilee anniversary of his entrance to the priesthood. The day of the ceremony is now fixed for the 31st of next December. There will be an exhibition opened in the gardens of the Vatican on the 1st of January, 1888, of the objects of art sent to the holy father in honor of the occasion. Anything intended for a present to the pontiff must be sent to Rome before Oct. 31, so that it can be properly classified. All the archbishops and bishops throughout the world have been invited to be present at Rome during the festivities. The dome of St. Peter's will be illuminated three nights previous to the jubilee day. This will be the first occasion on which this has been done since 1870. It is said that every parish, however small, throughout the world will be represented in this jubilee. All the crowned royalties in Europe will send presents. Lincoln and the Poets.

The following is from an editorial in the Century on "Lincoln

Lowell": "Several of the leading American poets have shown their appreciation of Lincoln in verse or prose-either during his life or since his tragic death. Indeed, an interesting study could be made of the tributes and allusions to the great Liberator by the principal writers of the country. Such a study would not omit mention of Stedman' sonnet on Lincoln's death, and his poem on the cast of Lincoln's hand, a part of which was reprinted in the "Blue-Eyed Mary," cried Mrs. El- December Century, or Dr. Holmes' kins, clasping her lilac-gloved hands memorial hymn, of Whitman's two poems on the death of Lincoln, or of Stoddard's stately and pathetic ode, and his sonnet published ten years ago in the Century. During the war the relations of Bryant with Lincoln were, perhaps, more important than those of any other of our poets with the President. Bryant had met him first when Lincoln was a Captain in the Black Hawk war, - and had presided at the Cooper Union meeting where the Western statesman delivered his now famous speech. Lincoln was Bryant's choice as a candidate as against Seward, and in personal interview as well as by letter and editorial, he encouraged, advised, and criticised the Lincoln administration throughout its existence. At Lincoln's death Bryant wrote the noble threnody which is familiar to all readers of American poetry. But we think it will be found that the literary record of Lowell in connection with Lincoln is more readdressing the man. ### Caste in Railway Travel.

According to a writer in the St. Louis Globe-Democrat, a peculiar system of railway charges is in vogue in

California. He says:
"I have discovered that in the local travel the railroads have three classes of coaches, with dress as a distinction. I was rather roughly clad after my mountain trip, and, approaching the ticket-seller's window, laid down a \$20 gold piece.

"'First, second or third class?' I was asked. "I replied that I usually traveled

first class. "He surveyed me, and then remarked that I'd have to go second class or not at all. It did me no good to object,

"I found first class to mean elegant coaches, where welldressed people only were allowed; second class for men of ordinary rough dress, and third class for Chinamen and negroes."

### The "Back Log."

It will surprise many persons of the present day to be told that the "backog" of which we read so much in oldtime stories was a large stone, a porous stone being preferred if possible. This stone was buried in the ashes, and on top was placed the "backstick." backstone in those primitive times played a very important part in the economy of early housekeeping; matches were not then invented; flint, steel, and tow were the only means of ighting a fire or a lamp; imagine for a moment the "Bridget" of to-day thus engaged with the thermometer 10 degrees below zero in the kitchen. The stone, together with the ashes with which it was covered, served to retain terrupted Dr. Merton. "Eh? What are you crying for now? Crying isn't finch, swings amid lace draperies, in a all that was necessary in the morning was a little kindling and gentle use of the indispensable bellows, and a fire was as readily made as at the present

In company with one of its librarians I lately took a walk through its various parts, and spent nearly a half day winding in and out through aisle after aisle, and wall after wall of books, picking my way between great stacks of volumes, and entering room after room which the eye of the ordinary visitor never sees. The national library is at the west end of the great capitol. Its thousands of volumes have long since overflowed its capacity, until now every available inch of space is utilized, and every room in the vicinity is stacked with books.

The very floors of the library are piled up with overflow, and the shelves seem almost bursting with their tightly-packed contents. The library proper, which is also the readingroom, consists of a long hall-like room with wings at each end jutting off like the head of a T. The reading-room is ninety-one feet long, thirty-four feet wide, and thirty-four feet high. Its walls are made up of rectangular alcoves, each about the size of a small hall bed-room, and shut off from the room by a door of iron lattice-work. The walls of these alcoves are filled with books, and there are three galleries of them rising one above another. In the front of the upper galleries are balustrades, and these have also been lined on the inside with book-shelves, so that as you walk along the narrow galleries you almost graze the books on either side.

The wings at the ends are fitted up with similar alcoves, and the whole looks like an immense bee-hive, with hundreds of cells of as many colors as vou will find in book-bindings. The visitors are the bees. They are not allowed, however, to go into these alcove cells, and the reading in the library is done at tables on the lower floor of the main room and of its wings. The library is almost always full of readers, and on Saturdays the crowd is so great that many do their reading while standing.

### Neatly Done.

During the retreat of Lee's army from the field of Gettysburg to the Potomac, says a writer in the Detroit Free Press, a great effort was made by the officers to prevent straggling, but t would have required an officer to a man to have carried out the program successfully. We had been beaten, and felt discouraged and reckless. The command to which I belonged left Gettysburg about 10 o'clock at night, and for the first three or four hours the men were kept well in hand under the impression that we were only changing positions to secure an

advantage over the Federals. As daylight broke and we realized that we were on the way home, squads and individuals broke away at every oppor-tunity to forage for a breakfast. In company with two private soldiers belonging in my company I slipped away from the column about sunrise, and, while a black-looking thunder-storm seemed close at hand, we bolted into a piece of woods by the roadside, and then struck for a highway running at right angles, and on which we could make out three or four farm-houses. ning of this century, turf having taken its place and served equally well, while opened the door and stood waiting for us to approach. ### TALMAGE'S SERMON.

Behind the Counter, or the Trials and Encouragements of Clerks.

Rev. T. DeWitt Talmage recently delivered the following in the Tabernacle at Brooklyn, taking for his text the following passages: And a certain woman named Lydia, a seller of purple, of the City of Thyatira, which worshipped God, heard us; whose heart the Lord opened.—

Seest thou a man diligent in his business? He shall stand before Kings.— [Proverbs xxii., 29.

The first passage introduces to you Lydia, a Christian merchantess. Her business is to deal in purple cloths or silks. She is not a giggling nonenity, but a practical woman, not ashamed to work for her living. the other women of Philippi and Thyatira have been forgotten; but God has made immortal in our text Lydia, the Christian saleswoman.

The other text shows you a man with head, and hand, and heart, and foot, all busy toiling on up until he gains a princely success.

Seest thou a man diligent in his busi-

ness? He shall stand before Kings. Great encouragement in these two passages for men and women who will be busy, but no solace for those who are waiting for good luck to show them, at the foot of the rainbow, a casket of buried gold.

to wait for something to turn up. It will turn down. The law of thrift is as inexorable as the law of the tides. Fortune, the magician, may wave her arm in that direction until castles and palaces come; but she will, after awhile, invert the same wand and all the splendors will vanish into thin air. There are certain styles of behavior which lead to usefulness, honor and permanent success, and there are certain styles of behavior which lead to dust, dishonor and moral default. I would like to fire the ambition of young people. I have no sympathy with those who would prepare young folks for life by whittling down their expectations. That man or woman will be worth nothing to Church or State who begins life cowed down. The business of Christianity is not to quench but to direct human ambition. Therefore it is that I come out this morning and utter words of encourage-

clerks in the stores, and shops, and banking houses of the country. In the first place, I council clerks to remember that for the most part their clerkship is only a school from which they are to be graduatel. It takes about eight years to get one of the learned professions. It takes about eight years to get to be a merchant. Some of you will be clerks all your lives, but the vast majority of you are only in a transient position. After awhile, some December day, the head men of the firm will call you into the

back office, and they will say to you: "Now, you have done well by us: we are going to do well by you. invite you to have an interest in our concern.

You will bow to that edict very gracefully. Getting into a street car to go home, an old comrade will meet you and say: "What makes you look so happy

to-night?" "Oh," you will say, "nothing, noth-

But in a few days your name will blossom on the sign. Either in the store or bank where you are now, or in some store or bank, you will take a higher position than that which you now occupy. So I feel to-day that I am standing before people who will yet have their hand on the helm of the world's commerce, and you will turn it this way or that; now clerks, but to be bankers, importers, insurance company directors, shippers, contractors, superintendents of railroads-your voice mighty "on 'Change"-standing foremost in the great financial and religious enterprises of the day. For, though we who are in the professions may, on the platform, plead for the philanthropies, after all the merchants must come with their millions to sustain the

movement. Be, therefore, patient and diligent in this transient position. You are now where you can learn things you can never learn in any other place. What you consider your disadvan-

tages are your grand opportunity. But you say: "Will the womanly clerks in our stores have promotion?" Yes. Time is coming when women will be as well paid for their toil in mercantile circles as men are now paid for their toil. Time is coming when a woman will be allowed to do anything they can do well. It is only a little while ago that women knew nothing of telegraphy, and they were kept out of a great many commercial circles where they are now welcome; and the time will go on until the woman who at one counter in a store sells \$10,000 other counter of the same store sells "It's no use trying to get out! quer the trials of their particular position. One great trial for clerks is the are people who are entirely polite everywhere else, but gruff and dietatorial and contemptible when they come into a store to buy anything. There are thousands of men and women who go from store to store to price things, without any idea of purchase. They are not satisfied until every roll of goods is brought down, and they have pointed out all the real It is folly for anybody in this world or imaginary defects. They try on all kinds of kid gloves and stretch them out of shape, and they put on all styles of coak and walk to the mirror to see how it would look, and then they sail out of the store, saying: "I will not take it to-day;" which means: "I don't want it at all," leaving the clerk amid a confusion of ribbons, and laces, other under the snow, which the inand cloths, to smooth out \$500 worth of goods-not one cent of which did that man or woman buy or expect to buy. Now I call that a dishonesty on while under the snow the people lived the part of the customer. If a boy runs into a store and takes a roll of cloth off the counter and sneaks out into the street, you all join in the cry pell-mell: "Stop thief!" When I see you go into a store not expecting to buy anything but to price things, steal. ing the time of the clerk and stealing the time of his employer, 1 say, to "Stop thief!" If I were asked which class of persons most need the grace of God amid their annoyances, I would ment to those who are occupied as

say: "Try goods clerks." Then there are all the trials of incompetent wages. Some of you remember when the war broke out and all merchandise went up, and merchants were made millionaires in six months by the simple rise in the value of goods. Did the clerk get advantage of that rise? Sometimes, not always. I saw estates gathered in those times over which the curse of God has hung ever since. The cry of unpaid men and women in those stores reached the Lord of Sabaoth, and the indignation of God has been around those establishments ever since; rumbling in the carriage wheels, flashing in the chandeliers, glowing from the crimson upholstery, thundering in the long roll of the ten-pin alley. Such men may build up palaces of merchandise heaven high, but after awhile a disaster will come, and will put one hand on this pillar, and another hand on that pillar.

been our pleasure to attend in some time accurred at this place last Saturday evening, it being the 50th anniversary of the married life of Mr. and Mrs. Michael Dawson. About 75 of their lating and friends exampled at their relatives and friends assembled at their house and as a token of their love and respect presented them with a gold banded set of China dishes and some glassware and other things. Mrs. J. glassware and other things. Mrs. J. M. Breining made the presentation speech in a few pleasant and well chosen remarks. A bountiful repast was served to all present. After enjoying a good social visit all departed for their homes feeling they had honored themselves by honoring so worthy a family. Mr. Dawson and wife came to this country from Ireland 20 years ago and have lived in this neighborhood. and have lived in this neighborhood ever since, respected by all who knew them. They have raised up a family of nine children of whom any parents might be proud

Reports of fine money collected during month of April.
Approved.
The following bonds were submitted and approved, viz: Erastus Samson, DeMosh Bros., Jacob Terns, and E. Bortle.
On motion, same were approved.
Ayes 9. Nays 0. Ald. Norton no vote.
From the Health Officer—
To the Mayor and Common Council:
I respectfully direct your attention to the fact that the nuisance so much and so justly complained of in the First ward, relative to keeping hogs in large numbers on Harriet street, has again been started in the same locality; also that some 15 or 20 hogs are kept by the same parties, in the barn and yard east of Huron street on Catherine street. Unless some action is taken by you in the matter, there will be roast pork in the neighborhood of this unbearable nuisance.
Ed. Batwell, M. D.,
Health Officer.
Referred to Board of Health.
To the Mayor and Common Council:
I respectfully direct your attention to the unsightly shed erected by Mr. Caleb Eaton in rear of his property on Huron street, and as the same greatly increases the risk from fire no my adjoining barn and residence, I hereby notify the Council that I will hold the city responsible for any damage that may arise from fire to my property in consequence of its erection.

REPORT OF THE CHIEF OF FIRE DEPART-MENT.

To the Mayor and Common Council:

In submitting my annual report as Chief of the Fire Department, I desire to congratulate our citizens on the immunity from fires during the past year, and that too, whilst the Fire record through our state has been larger, and involved a greater pecuniary loss than ever before. This must be ascribed to our good luck more than any effort to lessen the fire risks. Freedom from fire always engenders recklessness and carelessness, and I only wonder any responsible Insurance Company will take risks in Ypsilanti where such gross inattention is given to the subject of combustable matter in the business part of the city. The storage of gasoline and naptha, permitted in the rear of our stores and in the cellars, invalidates any insurance on these buildings, and has been often brought before your notice. The following is a list of the fires during the year:

April 21st, 1886, the tenement house on the south end of Washington street, occupied by George Hayes, was burned down. The contents were fully insured. Origin doubtful, as the family were all at church. It is a curious fact how many houses take fire while the families "are at church," and that the houses are well insured.

May 7th, the most destructive fire of the year took place in Parsons Bros. woodwork mill. Loss over \$6000, and an insurance of only \$3000.

May 18th, residence of Dr. Owen, Adams st.

year took place in Parsons Bros. woodwork mill. Loss over \$6000, and an insurance of only \$3000.

May 18th, residence of Dr. Owen, Adams st. Insured for \$1300.

June 26th, residence of Mrs. Wallace, Cross street. Loss (fully insured) estimated at \$2000. August 15th, the house known as the old Vaughn place, and owned by Mrs. E. Dunn, was burned to the ground with most of its contents. Insured for \$1500. While going to this fire the engine broke down, and was considerably damaged, but was again in the best of order at 3 o'clock in the afternoon. I desire to add my testimony to the zeal, ability and rapidity with which Mr. Jno. Lang performs any work entrusted to him from the Fire Department.

January 30th, 1887, after a period of five months without an alarm of fire, at four o'clock in the morning, the residence of Mr. James M. Forsyth, on east Congress street, was discovered to be on fire. The engine was soon placed at the bridge ready for service, but it was too far off from the fire, and was the nearest place to get water. Loss covered by Insurance of \$800.

March 28th, fire discovered in the Post bui.ding on Huron street. The room where it occurred was filled with electrical apparatus. The fire originated from an overheated flue. A large wood stove and steam engine opening their flues into a four inch chimney. The fire was put out by the Fire Co, without the use of the engine, though the engine was ready for work.

March 29th, fire was discovered in the rooms

work.

March 29th, fire was discovered in the rooms over Sherwood's shoe store, and for some time threatened to be a serious one, as the chimney where it originated was old and delapidated and the fire was spreading through the walls and flooring, but the Fire Co. prevented its spread, and put it out without the use of water.

and the first of the property of the control of the property o

five is obtaining wooden states within the fire limits.

I would again impress on your honorable body the urgent necessity of increasing the water supply for fire purposes. Those cities that have water works pay from five to twenty thousand dollars a year for such a supply. Now let Ypsilanti spend one thousand dollars a year, for a period of three or four years, in construction of suitable cisterns, utilizing the bounteous supply of water from the springs that crop out all over the city, and we will have a supply unexcelled by any of our neighboring towns.

MONDAY EVENING, May 2, 1887. Mayor-Clark Cornwell. ALDERMEN.

The New Council.

First Ward-Eli G. Boyce, Alonzo H. Gold-Smith.

Second Ward—Stephen A. DeNike, Reuben
D. Roys.

Third Ward—Austin Norton, Bernard Kirk,
Fourth Ward—Joseph Follmor, George A. eat. Fifth Ward—Wm. H. Deubel, Jacob L. Foers-

Gentlemen of the Common Council: Anther year has passed, the depression in busiess circles, that existed one year ago, has sen overcome, and the outlook is bright for the future. been overcome, and the outlook is bright for the future.

Two important questions were submitted to our citizens for their decision at the April election touching our duties as municipal officers. First, the question of bonding the city for water works, in compliance with a petition of 55 prominent citizens presented last year, the result being 759 against and 213 for. This result, of course, settles the question of water works regardless of its necessity. Second, the question of prohibition of he liquor traffic which was submitted by the Legislature of Michigan to the people.

I would call your attention to the vote of our city showing 65 majority in favor of the Amendment as against the present tax laws. A rigid enforcement of the tax law I deem advisible.

A rigid enforcement of the tax law I deem advisible.

The working force of our Fire Department should be made more effective. We have a new engine, plenty of hose and a good team, but the members are too slow in getting to fires. The few calls of the past year are rather more demoralizing than stimulating to the department. Another horse should be purchased and a hose wagon fitted to be drawn by horse thus enabling a few men to work the apparatus more effectually.

Our streets are in their usual good condition, simply perfect. Many plank sidewalks, however, are badly out of repair, and new ones should be ordered at once. I would recommend all street crossings to be put in of stone fast as repairs are needed. I believe it is cheapest, and that they are better is beyond question.

Our streets are lighted by 40 gas jets till 11 p. M., and 168 naphtha "bugs" till midnight. Many of the latter do not burn, and the complaints that "they were out" are plenty, but not in such shape that the city can remedy by deduction of the lamp lighter's bills, so we pay, light or no light. This street lighting should be improved. A better light and more of it is needed. I would recommend the electric light for streets. The electric light construction companies have made rapid progress in the last six years, and the cost of "plants" and light being cheaper and better than any known method. Flifty 20:00 candle are lights placed at intersection of streets would give us light equal to any city in the state, and not materially increase the present cost. I trust you will give the subject your consideration.

An ordinance preventing over charge by hackmen and cabmen should be made and and the proving the subject your consideration.
